FIG. 10 is a schematic diagram of a grid structure 30. The grid structure 30 is composed of a 10x10 array of cells. Each cell is defined by dotted lines. Within the grid, there are several horizontal and vertical line segments drawn in solid black. These segments are of varying lengths and are positioned within the grid cells. Some segments are single lines, while others are double lines. The segments are distributed across the grid, with some appearing in the top row, some in the middle, and some in the bottom row.
